

march 8, 1993

Dear Seymour,

I must write - as the typewriter would make my headache worse, just a small one threatening to become worse.

Richard Tilsen timed his article to coincide with my open house - and with the beautiful weather, so many people came to see the garden! It was a select group. They took the time to thank me for letting me see the place, and they were anxious to hear all of the stories and ask questions.

The street was jammed and about 200 people were there. By 5:00 P.M., I was exhausted.

Another article will appear in the Sunnyslope Chronicle this week. It is a weekly paper which started about a month ago.

I'll send you a copy.

marion

P. S.

Some people from Florida appeared. They are making videos of sites - like Grandma Pinabree - several places - It was exciting to hear about the places and the condition they are in. They bought a copy of your book - and they said they would send me a video they are producing. There were three or four of them.

Also, a lady who lives near Finster came by. I have her phone number in case I'm in Georgia some day. She said she would go with me to see him.

I found a copy of Fantastic Architecture. It should arrive any day. It will be such fun!

I guess that's it.

April 6 - To my surprise, about 150 people came to the open house on Sunday. They had saved the article from March 7th.

also, I had an interview for GRIT magazine. It sounds like a bikers' publication, but they told me it is a family magazine. Maybe some UFO stuff. I'll let you know.
