TO the citizens of Summitville:

My family & I have known Howard Fuster since 1979. We have watched "Paradise Garden" grow over the years with always new creations & inventions. It has, since our first visit, been a concern of ours that somehow this site should be preserved for future generations so that they may know Howard thru his work. We heartily support any effort by the community in which he has worked to make sure that Paradise Garden remains open & maintained for posterity. I feel that it would become a major tourist destination for your town & in so doing would

- ① preserve it for the future &
- ② bring tourism to town & expand your economic base.

Please do follow through on your plans.

Dr. James F. Arient &
family
