Dear Seymour:

I thought your review was fine, though I might have gone farther. I would definitely add to the section near the end that reads, "The book is well printed and designed..." that the binding is poor. I'd also like to see expressed some disappointment that the Museum of American Folk Art had lent its name to a work so devoid of scholarship, but that is a judgement call for you to make.

Thank you for letting me see it, and stay in touch.

Regards,

Bonnie Grossman
