Dear Seymour:

Enclosed please find some of the material that was discussed the last time my wife talked to you. We don't keep articles that are written just in a superfluous way such as Sunset, Better Homes and Gardens, etc. Usually if someone in their field says or writes something then we treasure it like gold for such people do not speak idly.

The Architecture Supplement required for landmark status is being completed this coming week and we are starting to finalize the forms to be submitted. Dr. Galen Cranz at the Architecture School at Berkeley and her associates are doing the Architecture Supplement -- thank heavens or we would probably never be able to do that portion of the application. By the way any number of photos you wish to send will be more than appreciated, and included with full credits given. Also, any cost involved, please let us reimburse you. Visitation at the Gardens will be picking up by June and we will be able to do so.

Before I forget what is happening on Romano Gabriel's Flowers in Eureka? If it comes to the point of their being destroyed, I would like to know. I just wish the Gardens was in a position to be a repository for this type of art that townspeople are uninterested in. Certainly if paintings can be hung in Museums, than rather than having this type art destroyed, there should be a repository for it. Anyway I would appreciate your keeping me informed on it.

Thank you.

Sincerely,

Rick

As we receive more articles we will send you copies for your files.
