

~~A~~ wanted me to sell it to China.

I gave the thought quite a bit of consideration.

To my way of thinking it is worth much to the United States.

I had no place to keep such a piece of machinery and have had a couple of other ideas stolen from me so I destroyed it, but the idea is still in my head.

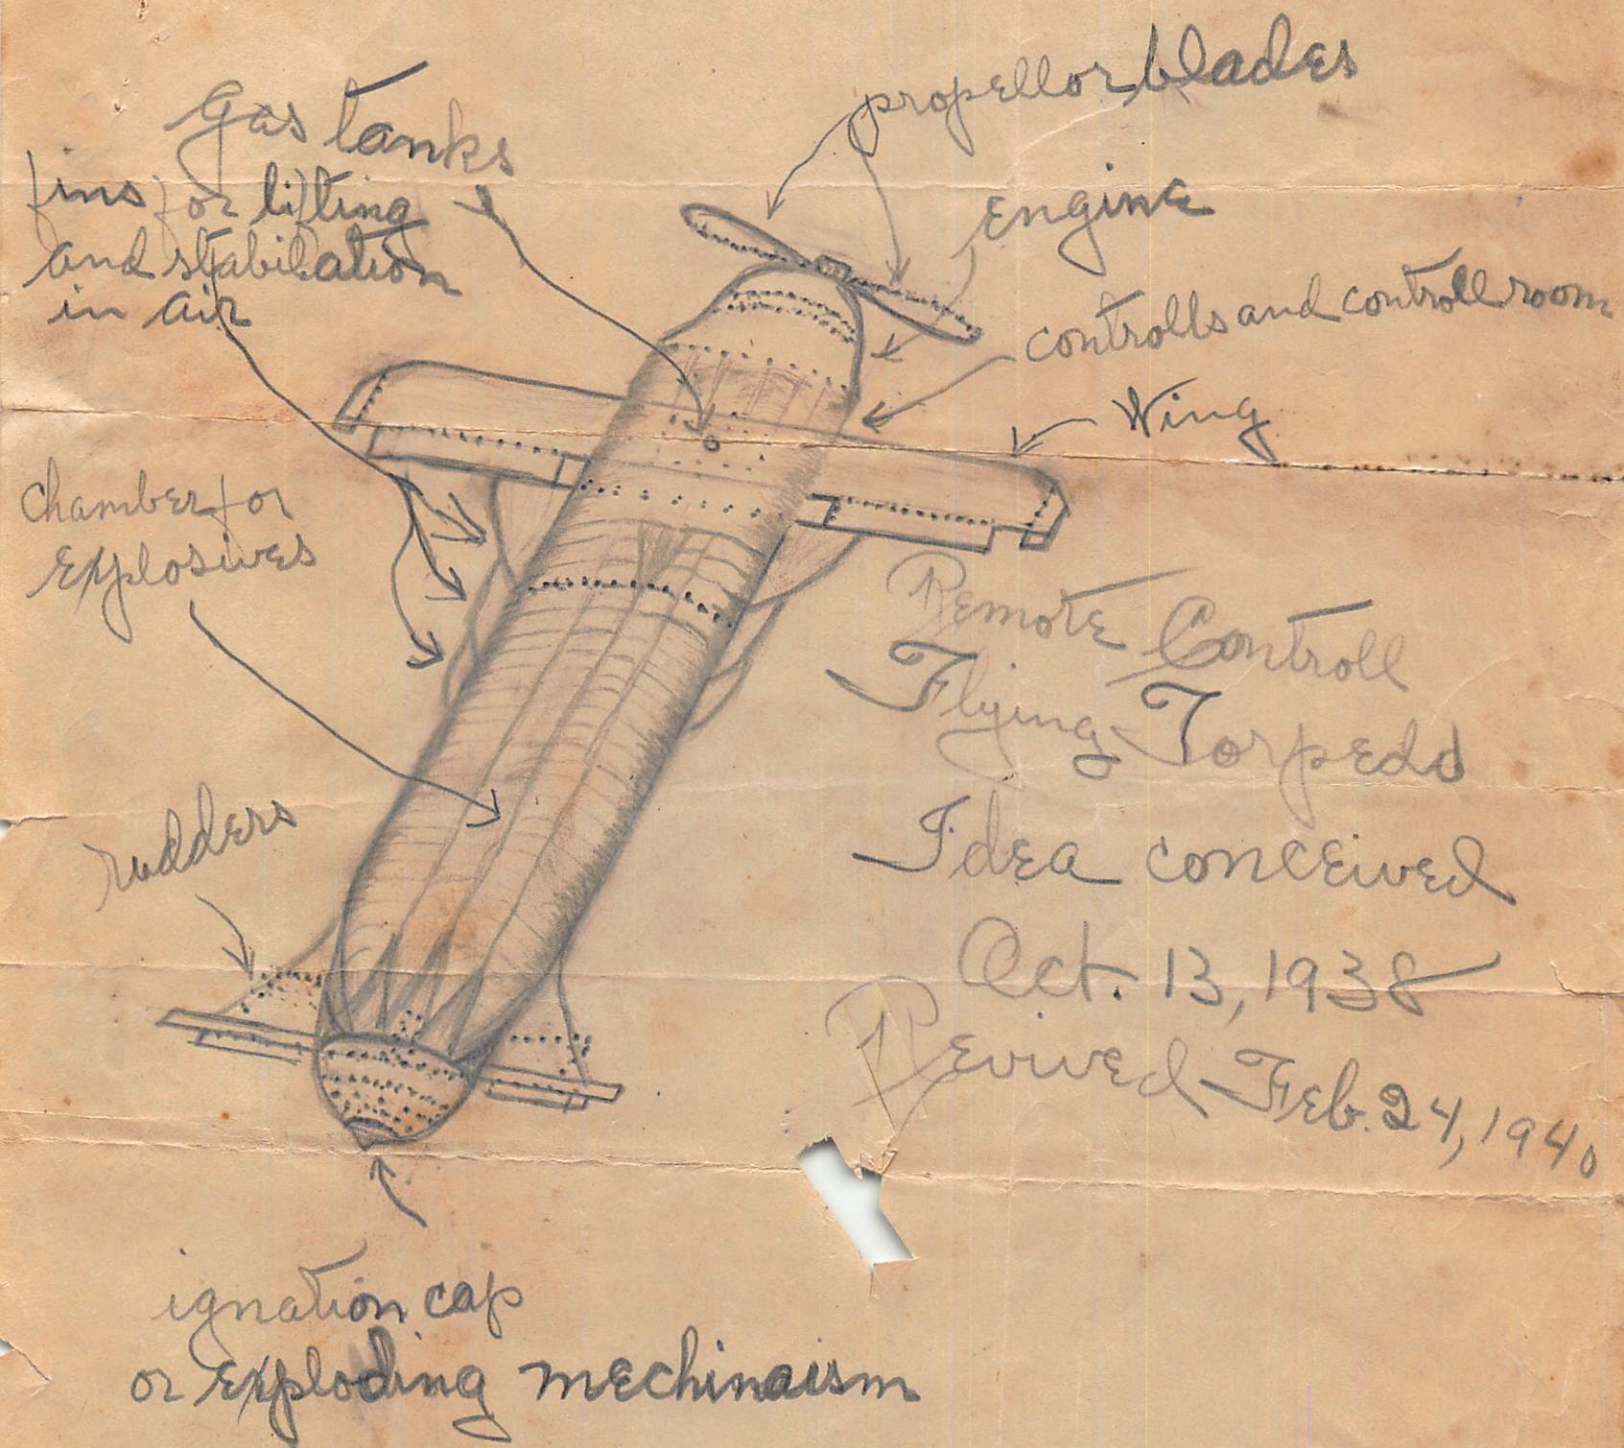

Do you think the Federal Government would be interested in knowing of the plans of such an invention?

I remain,

Truly,
Arthur D. Seal.
